About Us

Good Posture :

Most high end chairs available in the market today are not manufactured indigenously. They cater to the European market and their population, thus are not suited to the average Indian, especially our ladies who are comparatively petite. At Zitten, our chairs are custom-made in consultation with leading orthopedic surgeons to ensure complete spinal support and good posture. Being a manufacturing unit, Zitten also manufactures chairs for any size or shape. We can offer solutions for those who are 6-foot plus or even for those who carry an excess weight of 140kgs.

Vibrant and Trendy Colours :

The cheapest colour available in foreign-made chair is black. Therefore most imported chairs are in black. Black however is not vastu compliant. At Zitten, we have a wide range of vibrant colours and material e.g. leathers, pseudo leather, various fabrics and mesh, to compliment/contrast your interiors. Our wide colour/fabric range is an architect's dream. Thus, we at Zitten aim at giving you the latest trends.

Futuristic Designs :

Zitten Chairs are manufactured in consultation with leading Architects & Interior Designers. A great looking futuristic look is an integral part of every Zitten product.

Custom-made for any office:

Today, Office space can be anything from 200 sq.ft - 20,000 sq. ft and more. Zitten has a large variety of chairs to cater to every space, whatever it is compact or large. Our sofas too can be custom-made to fit any space requirement.

Availability of all models manufactured - past or present:

The life-span of an average imported chair on a dealer's shelf is one year. After that the product is usually discontinued in favor of new models. Research indicates that most leading organisations over the years, open up new office/branches first, in tier 1 cities and then in tier 2 and 3 cities. These organisations want the same models in all their branches for continuity. At Zitten, though committed to keep up with the latest trends, we ensure that all our models are available and the same model, if required can be supplied at a later date too.

Excellent After Sales Services :

Only the best components, sourced from all over the world go into the manufacturing of a Zitten product. However only standard sizes are used. This means that the components, if required, are available locally throughout the country.

Value for money :

Since you, our valued customer is buying directly from a manufacturing unit, like Zitten, you are ensured of getting your product at factory rates, without compromising on the quality.
